

Peak Management Service for Class A Customers

pTrack™ from Edgecom Energy - Manage your 5 peaks with the fewest number of curtailments and save on Global Adjustment using Ontario's ICI Program

The Global Adjustment (GA) portion of your Hydro Bill keeps increasing - but it doesn't have to.

The ICI program allows large electricity users to save 10-40% on their total bill - our pTrack™ service allows you to unlock these savings.

Peak Day Alerts - Our alerts will let you know when you need to reduce your energy consumption for maximum savings. Our proprietary software maximizes your returns and minimizes the number of times you need to curtail to hit the 5 peaks.

Monthly and Weekly Outlook - Receive a report every Sunday with the chance of peaks for the week ahead.

Guaranteed Results - We are confident that we will nail the 5 peaks - that's why we offer a performance guarantee.

Our proprietary pTrack™ software utilizes the latest machine learning, Game Theory modelling and A.I. techniques in analyzing and predicting Ontario's electricity grid in real time.

Electricity Costs Continue to Rise

Take advantage of our expertise to save on electricity costs.

Who Can Participate?

If your peak demand is above 500kW you are likely eligible.

Quick alerts make it as easy as possible

Our alerts are sent via text message, email and automated phone call. Your busy facility operators don't need to sit in front of a computer tracking graphs all day. We do the analysis and let your team know when to take action.

How does pTrack™ work ?

1 - UNDERSTAND HOW MUCH MONEY YOU CAN SAVE

Putting a dollar value on your potential savings is the first step. A preliminary audit will outline the potential savings for your company.

2 - ANALYZE YOUR OPERATION AND FIND PEAK REDUCTION OPPORTUNITIES

Analyzing your facilities' peak demand and historic load profile allows us to maximize your curtailment strategy and savings opportunity.

3 - KNOW WHEN THE PEAKS ARE AND REACT

Knowing when to reduce energy demand is the key to maximizing the benefits from the Industrial Conservation Initiative (ICI) program. pTrack™ has a proven track record of predicting and notifying of peak days with the fewest number of curtailment notices.

pTrack™ Software - Your ICI advantage

- Developed by a team of Data Scientists from the University of Waterloo.
- Analyzes and learns how others are behaving and improves predictions accordingly.
- Utilizes the latest machine learning and A.I. methods in analyzing and predicting Ontario's electricity grid in real time.
- This allows **GUARANTEED** results with far greater accuracy.
- The result is higher \$ savings for our partners - with less effort.

An Energy Audit assessment from Edgecom Energy will show you just how much money you can save.

ABOUT US

Edgecom Energy is an energy management consulting firm that provides comprehensive energy management solutions. Our team of experts has been involved in providing notification services and curtailment strategies for Global Adjustment and ICI program since 2011.

Edgecom Energy also provides services for Energy Audits, Turnkey retrofit projects and SaveOnEnergy project verification support for LDCs.
